PROMOTION EXAMINATION FOR SENIOR MANAGERS & MANAGERS.

TEST TYPE: SECTOR SPECIFIC & MANAGEMENT SCENARIO ANSWER ALL QUESTIONS DURATION: 2 HOURS

1

What is your full name?

2.

The potential difference between two points on an electrical circuit is often referred to as:

a. Voltage
b. Current
c. Power
d. Reactive Power

3.

The part of an electrical network where voltage and current transformation takes place is called:

a. Substation
b. Layout
c. Subsidiary Station
d. Power Station

4.

The selling unit of electrical energy is the Kilowatt hours which represents

a. Consumption of one kilowatt of energy for one hour
b. Consumption of one kilowatt of power for one hour
c. Consumption of one kilowatt-ampere for one hour
d. Residential meter reading

5.

Which of the following is not an operational department of Transmission Company of Nigeria (TCN)?

a. Transmission Service Provider (TSP)
b. Systems Operations (SO)
c. Market Operations (MO)
d. Industry Operations (IO)

6.

MAP is an acronym for

a. Metering Ability Provider
b. Meter Access Provider
c. Meter Asset Provider
d. Meter Advantage Provider

7.

Which is the correct acronym for Kilowatt hour?

a. KwH
b. kWh
c. KWH
d. Kwh

8.

The responsibility to ensure that customers are metered per the provisions of the MAP regulation is that of the

a. MAP
b. MAP & DISCO
c. DisCo
d. MAP, Disco & Customer

9.

The functions of the———-, as spelt out in Section 42.3.7 of the Market Rules, include the arbitration and settlement of differences between market participants in the Nigerian electricity market, which include the System Operator (SO), the Market Operator (MO), and other licensees engaged in the trading of electricity.

Fill in the blank

a. Customer Complaints Unit
b. Dispute Resolution Panel

c. Market Resolution Panel
d. Transmission Systems Resolution Panel

10.
The functions of the———-, as spelt out in Section 42.3.7 of the Market Rules, include the arbitration and settlement of differences between market participants in the Nigerian electricity market, which include the System Operator (SO), the Market Operator (MO), and other licensees engaged in the trading of electricity.

Fill in the blank

a. Customer Complaints Unit
b. Dispute Resolution Panel
c. Market Resolution Panel
d. Transmission Systems Resolution Panel

11.
Which statement best describes the function of the 'Situation Room' set up by the Commission during the lockdown?

a. System Operators Report Analysis/Monitoring, Customer Complaints Handling, and Transmission Company of Nigeria and Discos Interface Resolution
b. Customer service, NBET invoice settlement and TCN and Disco Interface resolution
c. A Twenty-Four-hour surveillance of the NESI which necessitated work shifts being established to ensure effective monitoring
d. Performance Monitoring framework established by NERC with direct reporting about KPI's to ensure system stability.

12.
Which statement best describes the need for stakeholder engagement in the process of drafting a regulation.

a. To ensure that all parties are carried along.
b. To prevent regulatory summersault.
c. To ensure the regulation is fit for purpose.
d. To ensure that the quasi-judicial role of the Commission is fulfilled.

13.
Based on the provisions of the Market Rules, Export means——?

a. Transportation of energy from the grid to the distribution network.
b. The flow of Energy from Nigeria to another Control Area
c. The flow of energy from the distribution company to the customer
d. The process whereby the voltage is stepped down to a lower voltage and transported by the grid to the distribution company.

14.
Which answer best describes planned Outage?

a. Outage which is scheduled
b. Outage which only occurs after the customers have been notified
c. Outage which occurs for a known duration e.g., 9am – 12noon
d. Outage which is scheduled and intentional.

15.
S.3 of the Estimated Billing Methodology provides for the categories of customers who may be issued estimated bills. Select the right category from the options below:

a. Customers who just moved into a new house
b. Customers with unresolved complaints about their bills
c. Existing Customers without meters
d. New customers who have only been issued an account number.

16.
Under the MAP regulation, the target was to meter a certain number of customers over a determined duration of time. Choose the correct number of Customers and the time frame within which they were to be metered from the options below:

a. All customers within three years
b. Two million Customer within five years
c. Two Million customers within Two years
d. All customers within Five years

17.
All DisCos classify their customers into categories based on their consumption/use. Which one of the categories below is not correct?

a. R1 & S1
b. C3 & D4

c. C2 & A2
d. S1 & R4

18.

Without prejudice to S.10 of the Cash Collection Regulation, all DisCos shall transit to cashless settlement platforms for the billing and collection of R3 class of residential customers by 31 March 2020. This statement is:

a. False
b. Impracticable
c. A clause in the Commission's Order on Mandatory Migration of R3 class of residential customers
d. A clause in the Commission's Estimated Billing Methodology.

19.

One of the statements below is correct. Choose the right one which states the objective of the Uniform Systems of Accounts

a. The main objective of this regulation is the implementation of the Uniform System of Accounts Guidelines 2017 on the generation of all accounting reports required by the Commission based on the information extracted from the general and subsidiary ledgers of licensees.
b. The main objective of this regulation is to ensure uniformity in all accounting reports.
c. The main objective of these Regulations is the implementation of the Uniform System of Accounts Guidelines 2014 on the generation of all accounting reports required by the Commission based on information extracted from the general and subsidiary ledgers of Licensees.
d. The main objective of this report is to ensure transparency and precision in data generated by Licensees in NESI.

20.

The onset of the Covid-19 pandemic has caused the Commission and the FGN to begin to think of innovative ways to ensure that if there is another lockdown, the FGN staff can work remotely. NERC has therefore adopted a particular project to ensure that staff can work wherever they find themselves. What is the name of this project?

a. SMART
b. REMOTE WORK
c. TEAMS

d. WORK S.A.F.E.

21.

A customer who relocates within the franchise area of a Disco shall apply for transfer of services including applicable credits for energy. Which of the Commission's Regulations/Order/Rule was this rule established by?

a. Estimated Billing Methodology
b. Customer Rights and Obligations
c. MAP
d. KYC

MANAGEMENT SCENARIO TEST

SCENARIO 1

You are the manager of a team of financial advisors who provide a service to the high net- worth private clients of Access Bank Plc. You have a team of 10 advisors and you are responsible for managing the team, supporting them in achieving their revenue targets and dealing with any client feedback.

Your advisors are specialists in high-value investments and are well-trained in their area of expertise. They have to work within strict guidelines with regard to the advice that they can give to clients (for example, they must always be able to demonstrate that they have clearly explained the risks involved in any investment to their clients).

The advisors have targets for earning commission and other income for Access Bank which are reviewed quarterly.

22.

Your team have been meeting their targets very well so far this year. It is currently late November, just coming up to the end of the third quarter and the team are on track to meet or exceed all their revenue targets.

You have just had an email from your line manager (the Head of Private Banking) who has congratulated you and your team on their performance. He has also said that because of the success of the team he is increasing their final quarter targets by 20%. In addition, he is keen to see the target for investment by clients in offshore bonds

being exceeded in the final quarter as they are 'selling like hotcakes' at the moment and the market is buoyant.

Review the following responses A to D and indicate which one you believe to be the response to the situation you would be 'most likely to make'

a. Send an email to your team letting them know about the new targets for Q4.
b. Call an immediate team meeting to let the team know about the new targets and say that people are welcome to come to you if they need further information or support.
c. Allow the team to enjoy their Christmas holidays, congratulate them on a job well done this quarter and wait until January to tell them about the target hike.
d. Meet individually with all your advisors as soon as possible and explain the challenge to them. Ask for their thoughts and input on how they might go about meeting the targets and addressing the offshore bonds push.

23.

It is late January and the team have been working towards an increased target for nearly a month. You have reviewed their performance informally just to keep tabs on progress and it appears that most of the advisors are hitting the new targets even with the 20% hike, although the likelihood of them significantly exceeding the offshore bonds target is low.

However, you have spotted that one of the team, Rick Essien, is falling behind and has not even equaled his third quarter performance (based on a like-for-like comparison). You haven't seen Rick for a few days as he has been travelling to meet clients elsewhere in the UK but when you last saw him, he looked rather harassed and tired. Another of the advisors mentioned in passing that Rick had talked about suffering from terrible insomnia at the moment and not being able to do anything about it. Rick is due in the office today; you have checked his calendar and he only has one client appointment this afternoon. It appears he is free this morning.

Review the following responses A to D and indicate which one you believe to be the response to the situation you would be most likely to make.

a. When Rick arrives take him for a coffee and say that you know he has got bad insomnia at the moment and that you feel sorry for him. Remind him of the bank's employee health insurance.
b. When Rick arrives, arrange a one-to-one chat for some time this morning. During the meeting, state the issue that exists with his performance currently. Ask him

what his views are on how to tackle the underperformance. Offer help if appropriate.

c. As soon as Rick gets into the office, call him aside. Ask him why he has such an empty calendar today when he is not meeting his targets and should be doing everything he can to 'up his game'.
d. Take Rick to lunch before his afternoon meeting and have a general chat about how things are going and how he is feeling.

24.

You have just received an email from Mr. G. Balewa. He is one of your team's most important and high-value clients. Currently the advisor assigned to Mr. Balewa is Rick Essien, who is falling behind his targets.

In the email, Mr. Balewa sets out three issues about which he is dissatisfied. Firstly, and most importantly, he asked Rick to make a large stocks and shares investment for him three weeks ago, and he has just found out that Rick only got around to making the investment yesterday. Secondly, Rick has missed two appointments with Mr. Balewa in the last month although they have been in regular contact on the telephone and by email. And finally, Mr. Balewa feels that Rick, on occasion, is presenting a bad image for Access Bank as he sometimes arrives at appointments wearing jeans and an open-necked shirt.

Review the following responses A to D and indicate which one you believe to be the response to the situation you would be most likely to make.

a. Immediately call Mr. Balewa and apologize. State that you will be talking to Rick very shortly to ensure that none of these issues ever arise again.
b. . Send an acknowledgement email to Mr. Balewa. Contact Rick as soon as he is next available and inform him of the problem; ask for the background to the issues. Call Mr. Balewa and apologize and inform him of how Rick and you plan to ensure these issues will not arise again.
c. Send an apologetic email to Mr. Balewa and assure him these issues will not arise again.
d. Immediately inform Rick and Mr. Balewa that you are switching Mr. Balewa's account to another advisor.

25.

It is April. You have just returned from an unscheduled seminar called by the Head of Private Banking at which an invited speaker explained there is to be an emergency change in the regulation of offshore bonds effective immediately.

The context is that there has been reported mis-selling of these bonds as they are a tax-efficient way of investing money but that SEC rules on the amount of value that one individual is allowed to hold in these bonds has been flouted on numerous occasions by unscrupulous traders and financial advisors. Therefore, from today, the purchase of these bonds will involve a 3-month lead-in period, whereby the bonds are held in a Government trust account whilst the purchase is investigated and approved by SEC.

The invited speaker at the seminar has stated that he believes that this will effectively "kill the market" in these bonds. There will still be demand from long-term, low-risk investors but the more short-term, growth-orientated investors will lose interest. Your team has particularly high targets for these bonds for the first quarter of this year as they had been selling incredibly well. Therefore, you now are facing three months of failure to meet this target as a team.

Review the following responses A to D and indicate which one you believe to be the response to the situation you would be most likely to make.

a. Email your advisors and inform them of the new regulations, include a link to the regulator's website to give them the full details of the changes.
b. Call a team meeting urgently and ask the team for ideas and input with regard to the issue of selling these bonds now. Ask for details of clients who are currently showing interest in these investments and brainstorm how to keep them interested.
c. Watch the financial news channels to see if there is more analysis and information that you can gather during the course of the day on this key regulatory change.
d. Speak to the Head of Private Banking and ask whether there is any chance that the first quarter targets can be amended or revised to take into account this new development.

SCENARIO 2

You are a Team Manager working for Goliath Pharmaceuticals in their Nigerian headquarters in Lagos. Goliath is a global company that develops, manufactures and markets medical drugs in 60 countries worldwide. You manage a team which is responsible for the research, support and marketing of Solotor which is a drug that combats high levels of bad cholesterol.

Your team consists of 15 research & development scientists and technicians and 4 marketing professionals. You also have 20 global account managers who support the sales of Solotor in all of Goliath's worldwide markets.

26.

You have just briefed the team on a new market launch for Solotor which will involve two of your global account managers and your R&D group. Goliath want to start selling Solotor in Ghana and the Togo in 6 months' time.

The Ghanaian food and drug regulations are different and more stringent than many other countries in the region and part of the team's job will be to demonstrate empirically (through recorded lab work) that the drug meets these safety standards. Following your briefing one of the R&D team, Bisi Harrington, approached you to say that she believes the launch deadline is unrealistic. She thinks this because in order for the research to count towards market approval, it must be published in a peer-reviewed journal and it can take up to 4 months to have a report approved for such a journal.

Review the following responses A to E and indicate whether you believe the response to be Very Effective.

a. Ask the R&D Team and the relevant account managers to outline a draft project plan based on realistic deadlines, by the end of the day.
b. Call the Head of Marketing Central & Eastern Europe and tell her that the deadline is not achievable.
c. Outline a draft of a project plan for the Russia and Ukraine launch. Incorporate Bill's comments about it taking up to 4 months to publish in a peer reviewed journal.
d. Tell Bill that the deadline has been set by the senior management and by the CEE Marketing experts and therefore it must be realistic.
e. Spend a day with the launch sub-team going through all the elements of the project and drawing up a realistic and detailed draft project plan.

27.

You have arrived for work on a Monday morning to the news that the Goliath Board of Directors have just announced there will be redundancies made in the Nigeria Office this quarter and that this could affect up to 20% of staff.

The announcement has been made on the Goliath internal staff website. There is no indication of who is under threat from redundancy in the information given, however it

has clearly put all your staff on edge, and no-one is in the mood to get on with their work this morning.

Review the following responses A to E and indicate whether you believe the response to be Very Effective.

a. See if you can find out any more information from your line manager and the HQ Human Resources team. Inform your staff that you are seeking clarification and let them know what you find out, if anything.
b. Buy coffee and doughnuts for the whole team from Swindon's top patisserie to cheer them all up.
c. Tell the team that there is no point in getting stressed as they probably won't be in the firing line and they should get on with their work to take their minds off the situation.
d. Call a brief team meeting to get the staff questions and concerns on the situation. Take their questions and put them to the Human Resources team. Inform the staff as to whether you receive any clarification or not.
e. Scrutinize the internal website and HR bulletins to see if you can find any extra information to enlighten or reassure your staff.

28.

You received an email from Bisi Harrington which she has labelled urgent and confidential. In it she tells you that she has just finished analysing a batch of tests for a routine review of Solotor's 'unintended outcomes'; sometimes called the 'side effects' of the drug. She says that she was stunned to find that there was a slight drop in the blood sodium levels of the rats she had been studying. The danger is that if Solotor really does have an impact on users' sodium levels then there is a risk of people developing hyponatremia which causes the kidneys to have to work very hard to maintain the right levels of sodium in the body. One of the extreme outcomes of hyponatremia can be the sufferer going into a coma.

Review the following responses A to E and indicate whether you believe the response to be Very Effective

a. Ask Bill to replicate the study and ask one of Bill's colleagues to verify the results.
b. Call the manufacturing plant in Poland immediately and tell them to halt production until a change can be made to the 'possible side effects' information given with the drug.
c. Call a contact of yours at Science Today magazine and ask whether he knows of any recent media coverage of hyponatremia.

d. Take Bill's data to your boss and alert her that there may be an issue here.
e. Bring in an independent laboratory to verify (or disprove) Bill's results.

29.

One of the key ingredients in the outer coating of the capsule form of Solotor is magnesium stearate (MS); it is made from hydrogenated palm oil. Due to the worldwide outcry against oil palm plantations (which have been found to be responsible for a large amount of deforestation in the tropics which leads to the displacement of wildlife and the warming of the Earth's climate) the production of palm oil has fallen drastically and the price risen. Therefore, the cost of magnesium stearate has risen as well.

You have been asked to attend an emergency meeting to discuss the implications for the cost of Solotor manufacture; colleagues from Finance, HQ Marketing and Manufacturing (Europe) are also attending the meeting.

Review the following responses A to E and indicate whether you believe the response to be Very Effective

a. Ask your team to attend the meeting with you to present information to the attendees about what the function of MS is in the design of the Solotor capsule.
b. Research the cost of MS as a percentage of the entire cost of a single unit of Solotor; run a projection to show how an increase in the cost of MS affects the cost of Solotor production.
c. Search the internet for low-cost sources of MS; compare prices between manufacturers.
d. Attend the meeting and ask your colleagues how you might be best able to help them.
e. Ask your team for a full report on how MS is used in the Solotor capsule which they initially designed; ask for a list of valid alternative ingredients, if possible.

SCENARIO 3

You have been contacted by Infinity Zone Limited, a small Port Harcourt based toy manufacturer and retailer which is beginning to show a lot of potential, despite only being established within the last few years. The company are unsure of the next steps they should take, as the business is technically still in its infancy and they feel at risk of making important decisions prematurely. Infinity Zone have employed you as a management accountant in an advisory position. Your role requires you to assess the

current state of the business and provide an assessment of risks to the business, in regard to implementing new strategies and increasing production.

30.

According to the revenue generated during this financial year, Infinity Zone have managed to significantly increase their profits from those of the year before. This could possibly be due to the introduction of the Phantom Fighter line, based on a popular children's television show. It is unclear how long the show will run for, or if the sudden upsurge in demand for Phantom Fighter characters will continue. However, the company do not want to miss an opportunity and are keen to use this as a chance to expand and obtain new business.

Review the following responses and indicate which response you believe to be the most effective response.

a. Instruct the company to expand and increase production immediately, as they should make the most of the current situation by capitalizing on their recent popularity.
b. Suggest that Infinity Zone should cease production of the Phantom Fighter line and focus on acquiring the licence to produce a more established character range, with reliable and evident staying power. This strategy will avoid relying on an unstable brand.
c. Encourage the company to be patient before hastily expanding the business, this allows them to assess the staying power of their current success and to save resources for development expenses at a later date.
d. Advise that the company make a full assessment of the profit generated throughout the most recent year. If the profit is attributed to a range of their products, not just the Phantom Fighter collection, it may be an appropriate time to expand.

31.

Infinity Zone have been looking to acquire licensing patents, in order to increase the range of toys currently in their production and to improve stock variety. They have expressed interest in purchasing the rights to Turbo Titan Trucks, as it would provide the company with a range of merchandise choices, from plastic models to interactive racing games. However, this specific brand has received interest from a number of competing companies which in turn has led to a substantial premium in asking price. A cost-benefit analysis has provided you with information suggesting that the purchase of the Turbo Titan Truck patent might not be a lucrative strategy for Infinity Zone, however, the company remain keen to proceed.

Review the following responses and indicate which response you believe to be the most effective response.

a. Insist wholeheartedly that Infinity Zone respect the findings of the cost-benefit analysis. After all, you were hired to assess business risks and to advise them in their future ventures. All the while, suggesting that you might remove yourself from their employ if they disregard your professional opinion.
b. Support the acquisition of the patent, suggesting that there could be something that you overlooked when performing the analysis, thus removing cause for concern.
c. Perform another analysis in order to double check the previous figures, if this provides the same outcome, reiterate its importance to those in charge of making the final decision.
d. Double check the figures and inform the company that going against the cost-benefit analysis would not be advisable, although you appreciate that it is their choice as to whether they pursue this business opportunity or not. Offer some contingency plans, in order to protect the company if necessary.

32.

The company are being approached by an established high street retailer regarding stocking and distributing a range of Infinity Zone's products. However, due to the size of the retailer, they only deal with companies who can provide a certain number of units and Infinity Zone are currently unable to produce the minimum requirement. To increase output, Infinity Zone are considering rationalizing the number of moving parts in each toy as this is the only logistical way to increase the number of units produced. However, this would also significantly compromise the functionality of the products, which is critical to customer satisfaction.

Review the following responses and indicate which response you believe to be the most effective response.

a. Encourage Infinity Zone to decline the offer, informing the retailer that they would be unwilling to compromise the quality of their products, while also expressing their interest in accepting the offer when they are able to produce the necessary amount of units.
b. Propose a compromise with the high street retailer by supplying a small number of high-quality products for "provisional distribution". The retailer can then assess whether they are willing to reduce their unit requirement depending on customer satisfaction and sales performance.

c. Advise that the company reject the offer from the high street retailer as they are unable to meet the minimum unit requirements at this time.
d. Suggest that Infinity Zone increase their output and accept the offer immediately, as it's a great opportunity for profit growth and improving company awareness.

33.

There has been a disagreement between two company directors over the opening of a new store. One of the directors is adamant that it is time to open a chain of shops in order to increase distribution; however, the other director is concerned that this would be too large an expenditure for the company at this time. Your financial assessment suggests that it could be premature to pursue a strategy of a large high-street presence, although failure to pursue this option could miss a lucrative business opportunity. You have reservations about tackling this issue as you do not wish to offend either of the directors; however, the dispute has been escalating over the past couple of weeks and does not appear as though it will be resolved without your input.

Review the following responses and indicate which response you believe to be the most effective response.

a. Allow the directors to come to a decision between them, after all, they will have the final say whether you provide input or not and this avoids the possibility of displeasing some of the most powerful people in the company.
b. Request a meeting with the directors so that they can both communicate their beliefs and concerns regarding this matter. You will be present to provide counsel in case the situation becomes unproductive.
c. After consideration of both directors' opinions, make a decision as to which of their strategies would be the most effective for the company and convey your apologies to the director with whom you did not agree.
d. Offer alternative solutions, such as an on-line store. This would satisfy the need to increase distribution, while requiring a smaller financial expense.

SCENARIO 4

Salucci's is a traditional Italian bistro located in Abuja and was founded approximately fifteen years ago, originating as a family-owned restaurant that generated popularity for its hearty authentic cuisine. Salucci's currently has three restaurant locations, with a possible fourth in development and hopes for further expansion in the near-term. Due to the planned growth of the business, it is vital that Salucci's have access to the relevant

expertise necessary to make logical, informed decisions regarding forthcoming projects and ventures.

For these reasons, Salucci's have sought your help as an actuary. This role which requires your accurate assessment of current situations and future investments, in order to identify, reduce and counteract potential threats to the success of prospective developments.

34.

You have been brought in by the company to replace the previous actuary, who unfortunately is no longer able to continue due to ill-health. Your predecessor had been finalising assessments of a potential investment and was yet to come to a conclusion as to whether it would be advisable for Salucci's to proceed. The company are very keen to go ahead with the investment. There is plenty of time to familiarise yourself with the data, as the contracts will not be drawn up for some time and you have been informed that all previous workings should be accurate.

Review the following responses and indicate whether you believe the response to be Very Effective

a. Avoid relying on the assessment provided by the previous actuary and re-assess all of the information provided, in order to formulate your own data.
b. Go over your predecessor's workings, trusting that they are accurate. Make a swift decision based on the existing assessment, allowing Salucci's to continue developing the project as quickly as possible.
c. Take thorough consideration of your predecessor's workings and advise Salucci's based upon your interpretation of the information.
d. Advise that Salucci's proceed with the proposed venture, as you are aware, they are keen to do so, allowing the company to make up for the time lost employing a new actuary.
e. Re-assess all of the information provided by the previous actuary and formulate your own data. Arrive at a decision based upon your own assessment, while keeping in mind the workings of the previous actuary.

35.

Salucci's are eager to purchase a specific plot of land for the construction of their fourth restaurant, having searched thoroughly and found it to be an ideal location with prospects of expanding their clientele base significantly. However, a survey of the terrain was inconclusive, suggesting that during construction it might be discovered that significant reinforcement works are required to underground utility tunnels. The location

is receiving a lot of interest due to general lack of availability in the area, meaning that the company will need to come to a decision soon, or risk losing the plot to another buyer.

Review the following responses and indicate whether you believe the response to be Very Effective.

a. Assess the likelihood of further finances being required to develop the groundworks, in order to provide Salucci's with more clarity of the risks related to purchasing the land.
b. Suggest that Salucci's look for a different plot of land to purchase as the location for their fourth restaurant.
c. Encourage Salucci's to purchase the land as you are aware that they are keen to do so. Reassure them that any extra costs could probably be covered by the increased clientele brought in by the new location.
d. Quantify the costs involved in extra groundworks. Assess whether the company have the financial reserves available to put aside as an insurance policy. Base your judgement on this information and the likelihood of further development being required.
e. Perform a cost assessment of the remedial groundworks, in order to calculate potential further expenditure. Present this to the company along with an evaluation of the likelihood that the foundations will require development.

36.

Prior to the construction of Salucci's fourth restaurant, the company have expressed concern about expenditure and would like to reduce costs if possible, without delaying construction. To this end, Salucci's are considering hiring PHC Ltd, an inexpensive, although less experienced, construction business as an alternative to the highly qualified, yet more expensive company they have employed in previous years. Analysis of PHC Ltd.'s portfolio suggests that they should be able to complete the task adequately, however there are concerns as PHC Ltd have not received particularly positive reviews and the premiums previously put aside as contingency have largely been spent.

Review the following responses and indicate whether you believe the response to be Very Effective.

a. Inform Salucci's of the risks associated with hiring PHC Ltd and make the company aware that employing less experienced contractors could result in potential further expenditure.

b. Propose that Salucci's look into alternative construction companies, in order to find labourers better suited to meeting the company's pricing requirements.
c. Suggest that the company employ PHC Ltd in order to cut down any unnecessary expenses; after all, your analysis of their portfolio suggests they should be able to complete construction.
d. Inform the company of the negative feedback received by PHC Ltd and calculate the additional capital that Salucci's could be required to spend in the event of the restaurant being built to an unsatisfactory standard.
e. Recommend that Salucci's employ the more experienced company while suggesting other possible cost reductions such as materials or architectural design.

37.

The company directors at Salucci's have grave concerns regarding the liquidity of their assets, as most of their cash is currently tied up in construction projects. Although the restaurants are becoming increasingly popular, awaiting return on their investments has the company growing ever more apprehensive about unforeseen expenses. Salucci's are reluctant to sell any of their restaurant locations, having put so much time and effort into expanding their business empire.

Review the following responses and indicate whether you believe the response to be Very Effective.

a. Propose the implementation of a new pricing system within the restaurants, allowing Salucci's to receive greater profit in a shorter period of time.
b. Reassure the company directors that they should be patient, as the restaurants are becoming "increasingly popular" and look set to produce profit in the near future.
c. Encourage the company to sell one of their restaurants, they might be reluctant, but it would protect them from bankruptcy.
d. Introduce a franchising scheme, entitling Salucci's to a portion of the profit generated by privately-owned restaurants, keen to monopolize on the recent success of the brand.
e. Prepare a list of options to raise short-term that Salucci's sell some shares in the company, as this allows financial insurance for any additional expenditures while also permitting them to maintain ownership of all business locations.

DIAGRAMATIC REASONING TEST

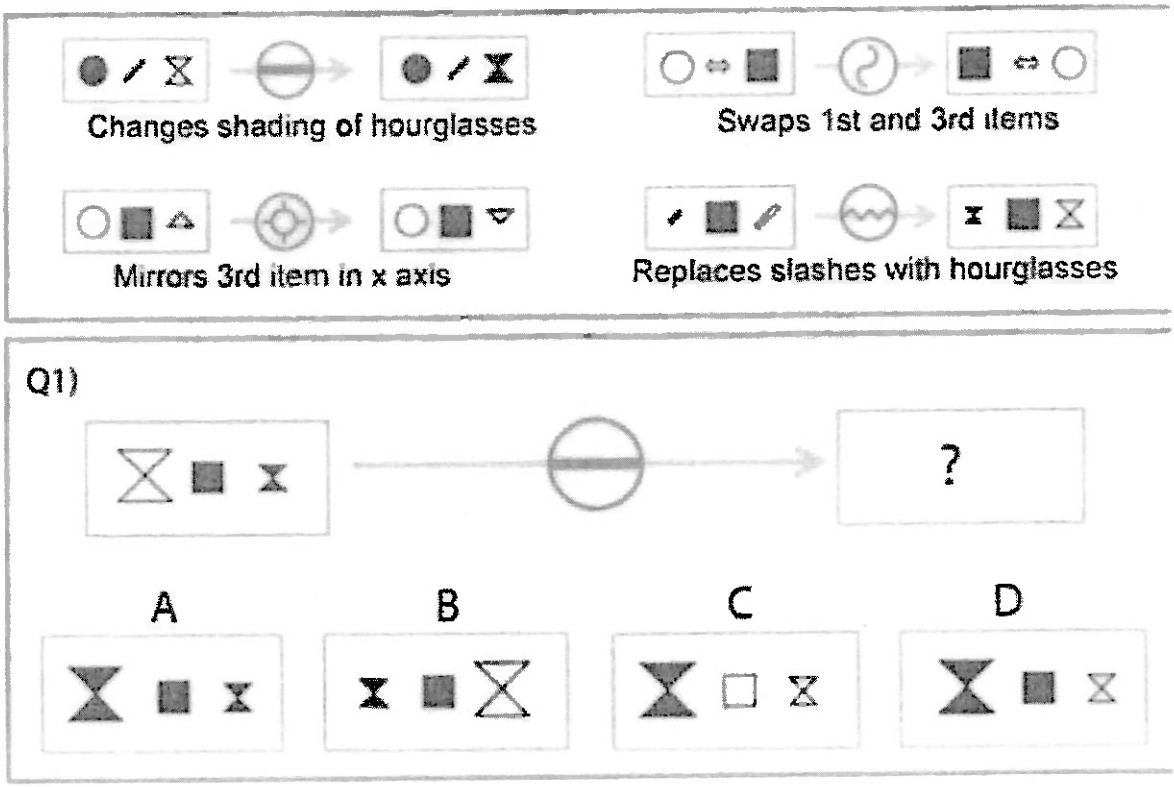

INSTRUCTIONS

The diagrammatic reasoning test comprises 5 questions. You will have 5 minutes in which to correctly answer as many as you can.

Each question contains a process with an input diagram, one or more 'operators', and an output diagram. The effect of the operators is described in the key to each question. Your task is to study the process and decide which of the options given best answers the question.

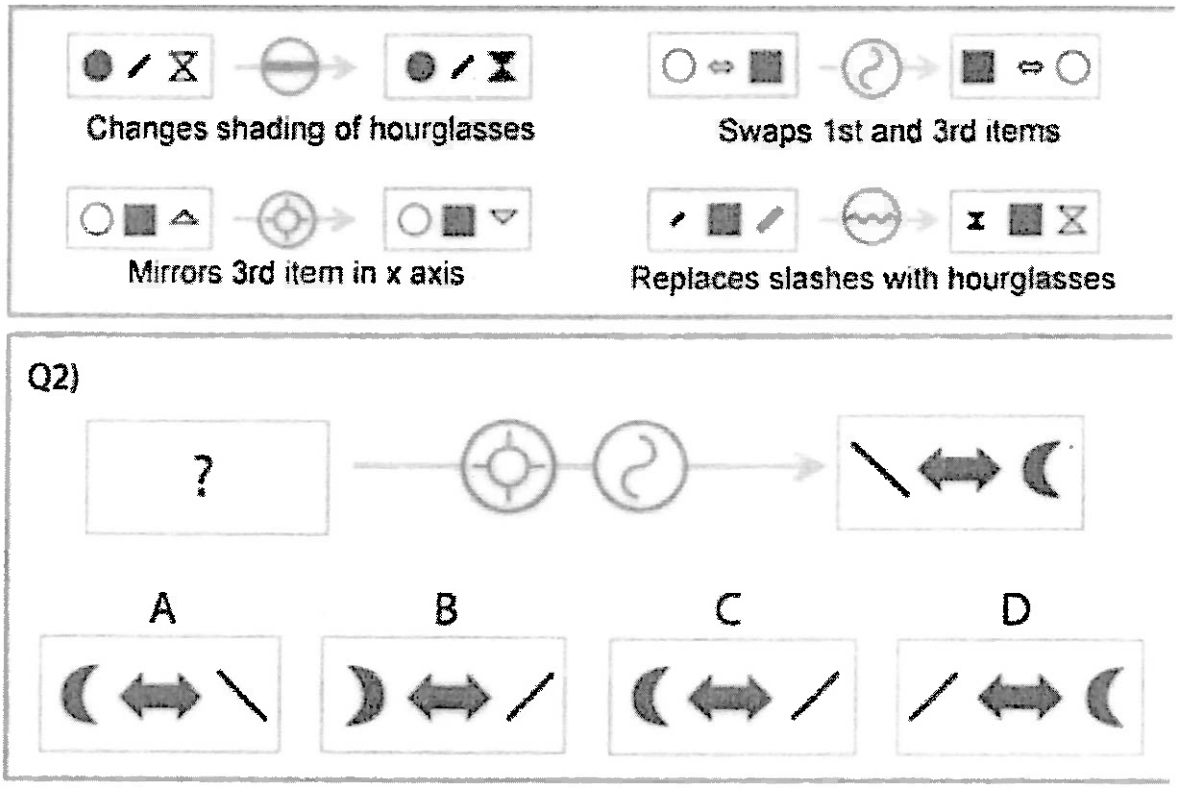

38.

What replaces the question mark?

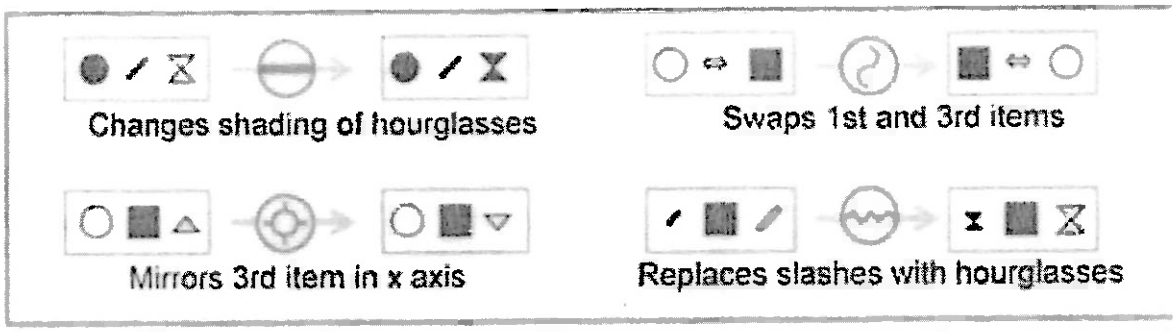

a. A
b. B
c. C
d. D

39.
What replaces the question mark?

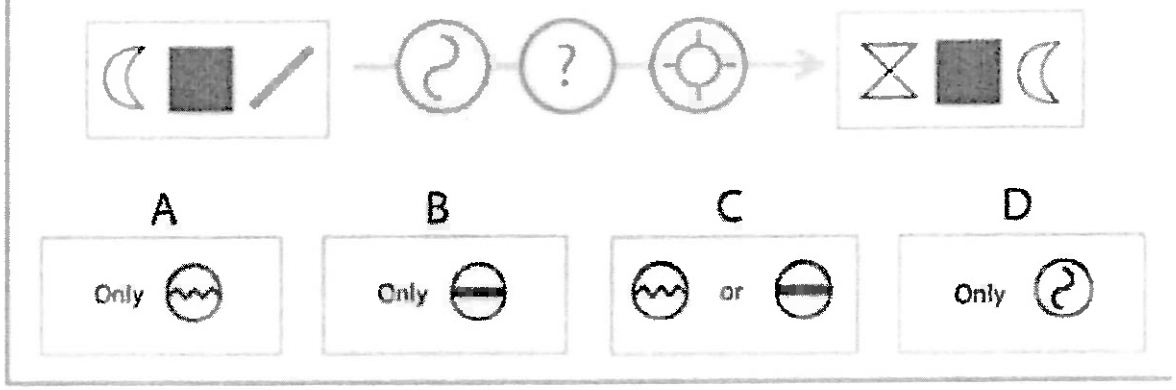

a. A
b. B
c. C
d. D

40.

d. D

ADVANCED NUMERICAL REASONING

INSTRUCTIONS

The numerical reasoning test comprises 5 questions, and requires you to make a comparison between two quantities, A and B. For some of the exercises, additional information is given which should also be used in your determination of quantity.

43.

A. Employee A received 36 emails in 5 working days
B. Employee B received 76 emails in two working weeks.
Per work day on average, which value is greater A or B?

a. Quantity A is greater than Quantity B.
b. Quantity B is greater than Quantity A.
c. Quantities A and B are equal.
d. Insufficient information is given to make the comparison.

44.

A. A large bag, containing potatoes which weigh on average 250 grams
