

Data Science Nigeria AI+ Community NEWSLETTER

July 2020 Edition

1. Community Updates

Here are some quick updates on recent happenings within the Data Science Nigeria (DSN) AI+ Community.

1. VACANCY Data Science Nigeria EdTech project is seeking world-class professionals to lead a funded, social good, & innovative m-learning platform aimed to support millions of students without internet access during this prolonged COVID19 period Details: https://datasciencenigeria.org/ed-tech/

2. Don't miss Plagiarism and Research Ethics Masterclass with @ensoesie Ass. Professor at Boston University, USA & founder of http://Rethe.org Wednesday 29th July 3 -5 pm (GMT+1) Internet Data Gift is available to qualified AI+ members. Register: https://bit.ly/ethicalResearch

3. The DSN AI campus/ city leads all now have an official Data Science Nigeria email. Kindly reach out to any of our campus/ city branches via these emails present on our community platforms here.

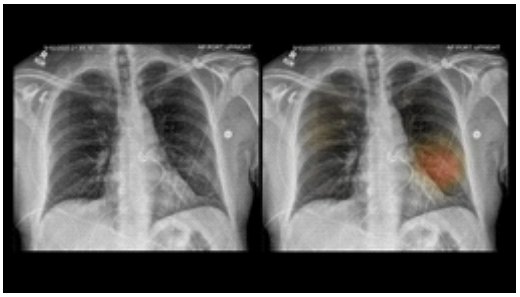

4. Join the fastest growing AI community in Africa! Become a member of Data Science Nigeria. Open your Data Science Journey to a new world of possibilities by joining a family. To register, click here. See our community platforms here.

5. Are you a super teacher or do you know one? Be a part of a funded national audio learning project we are leading to support millions of students with no internet & unable to go to school due to COVID-19 It's a novel mobile learning approach! Visit http://bit.ly/DSNSuperTeacher

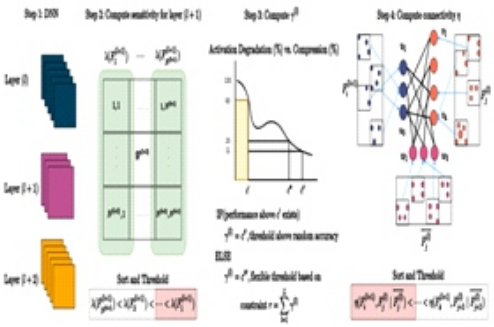

6. We are excited to win the BEST Poster award at the 21st ACM Conference on Economics Computer (EC'20) - a global conference on the interface of economics & computer science with our work - "Shared Trust to end poverty & promote financial inclusion" Visit https://bit.ly/Ec_posters

2. Interesting articles/research works to read as a Data Scientist

The following information gives you insights into awesome developments in machine learning and how AI is reshaping the world.

1. The history of artificial intelligence (AI) is a history of overcommitment and underdelivery in real-world "production" environments. But on closer inspection, AI is highly useful in medicine as opposed to other domains and will rapidly increase in usage. Read more.

Slimming Neural networks using Adaptive Connectivity Measures(SNACS), as an algorithm that uses a probabilistic framework for compression while incorporating weight-based constraints at multiple levels to capitalize on both their strengths and overcome previous issues. We show that our proposed approach is faster by over17x the nearest comparable method and outper-forms all existing pruning approaches on three standard Dataset-DNN benchmarks:CIFAR10-VGG16, CIFAR10-ResNet56 and ILSVRC2012-ResNet50. Read more.

3. Data Science Nigeria Ongoing Events

1. It is here again! Data Science Nigeria AI Bootcamp - a gathering of the best of the best, taught and mentored by world-class experts! You cannot afford to miss this immersion of world-class learning, best practice knowledge and cutting-edge mentoring. The Data Science Nigeria AI Bootcamp 2020 edition will hold between 20 and 25 October and will accept 250 best candidates after an intensive 70-day learning, Kaggle project and a validation one-on-one quiz. Get to prepare ahead by enrolling for Data Science Nigeria 70 days pre-boot camp online classes. It is exciting to have over 2,500 students in our daily #DSN70DaysOfML learning in ML & DL towards #AIBootcamp2020 -Classes structured into small groups on Google Classroom -Daily class & assignment -Realtime support -Supported by world-class content from @DeepMind

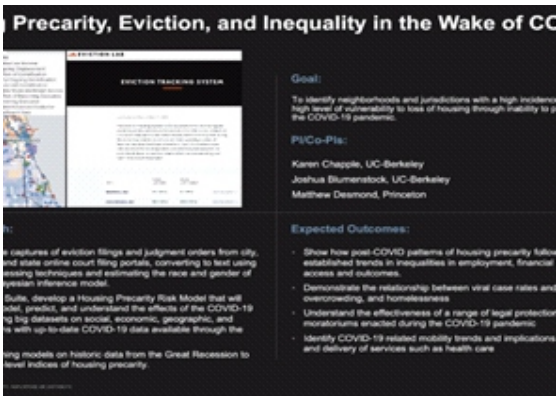

4. AI/Data/Digital News Update

1. Customer sentiment analysis: is basically, analyzing the feedbacks, reviews and comments of the customers on social media, your website, your customer support center or any other place meant for taking customer's feedback. If you are looking for annotated datasets for sentiment analysis, then Cogito is the best online platform for data annotation. Read more.

2. Emphasis on drug safety is the key factor for the rising demand for pharmacovigilance solutions. With the focus on drug safety regulations on improving the drug quality more and more, pharmaceutical industry players are now depending on pharmacovigilance solutions. However, at times, it gets difficult to access huge amounts of patient data, which becomes a major pain point for the companies in the pharmaceutical industry to execute a holistic digital vigilance on the data that is generated. By deploying data mining and taking EHRs into consideration, artificial intelligence in pharmacovigilance successfully provides improved healthcare assistance. Read more.

3. C3.ai's Digital Transformation Institute awarded $5.4 million to 26 researchers to apply artificial intelligence models to COVID-19 mitigation. The research projects looked at COVID-19 as well as its impact on housing precarity, eviction and inequality as well as the role of social determinants on health and using data science to detect and understand transmission. Read more.

5. Opportunities and scholarships

1. Global Pulse is hiring Data and AI Policy professionals with a focus on the African region. Both posts shared are Kampala based (but remote for the time being, given the pandemic situation). We would be most grateful for your help in disseminating these vacancies to relevant professionals in your networks

AI Data Policy Analyst:
https://jobs.unops.org/pages/viewvacancy/VADetails.aspx?id=20067 (apply by 6 August)

2. The Facebook Fellowship is a global program designed to encourage and support promising doctoral students who are engaged in innovative and relevant research in areas related to computer science and engineering at an accredited university. The program is open to students in any year of their PhD study. We also encourage people of diverse backgrounds and experiences to apply, especially those from traditionally under-represented minority groups. Read more about the application here. Deadline is October 2, 2020, 12:00pm PST.

3.Microsoft launches initiative to help 25 million people worldwide acquire the digital skills needed in a COVID-19 economy. Click here for more.

We do hope you enjoyed the reads.
Best regards,
Data Science Nigeria AI+ Community.
