PROFILE

- Business Systems and Application Support Analyst with 3+ years of experience supporting enterprise applications, data analysis, and reporting systems across engineering, public sector, and SaaS environments.
- Master's degree in Information Management, Advanced Diploma in Technology Management, and Bachelor's degree in Computer Science.
- Proven ability to support enterprise systems by analyzing, developing, and maintaining reports and dashboards using Excel and CRM tools, with exposure to Power BI for data visualization.
- Experienced using SQL, JavaScript, and Python for web development and proficient using Microsoft Office.
- Strong understanding of troubleshooting methodologies and root cause analysis, ensuring timely resolution of system issues while maintaining data integrity, accuracy, and system reliability.
- Experience supporting business systems optimization, process improvement, and automation initiatives, enhancing application performance and reporting efficiency.
- Demonstrated customer-focused application support, providing timely user assistance, resolving technical issues, and adhering to best practices and service standards.
- Skilled in developing and maintaining technical documentation, user guides, and training materials, supporting system adoption and end-user enablement.
- Highly organized and detail-oriented, with a proven ability to prioritize tasks, manage multiple support requests, and work independently in fast-paced environments.

EXPERIENCE

SMS Engineering

Winnipeg, MB

Data Reporting Analyst

Oct 2024 – Present.

- Maintained standardized RFI and submittal reporting processes, ensuring accurate tracking, data integrity, and timely delivery to support document review timelines.
- Managed project directories, ensuring accurate document naming, numbering, and version control to maintain data integrity and support efficient document retrieval.
- Oversee RFI and Proposed Change Notice (PCN) reporting using Microsoft Excel, ensuring accurate tracking and mitigating the risk of project delay claims.
- Supported integration of Asana with Power BI, contributing to dashboard development, data visualization, and automated reporting of project performance metrics.
- Managed and prioritized RFI project correspondence, organizing incoming requests, flagging urgent communications, and ensuring timely responses to support cross-functional collaboration and project timelines.
- Engaged in cross-functional collaboration to enhance workflow processes and drive operational efficiency.

Ulesson Education Group

Abuja, Nigeria

Application Support Analyst

Jun 2023 – Dec 2023.

- Delivered Tier-1 application support while analyzing user data and system performance trends to support reporting and continuous improvement initiatives, reducing repeat support tickets by 5%.
- Analyzed customer feedback and application usage data to identify trends and support data-driven decision-making, influencing product backlog prioritization.
- Maintained and validated CRM data integrity within Freshsales, ensuring accurate data for reporting, sales tracking, and business insights.

- Leveraged dashboards to analyze customer engagement, sales funnel performance, and operational metrics, generating insights to support reporting and data-driven decision-making.
- Onboarded over 500 customers while capturing and documenting key user data to support reporting and customer success metrics.
- Provided data-driven recommendations based on customer engagement dashboards, improving product adoption, usability, and customer satisfaction.

Federal Inland Revenue Service (FIRS)

Abuja Nigeria

Application Support Analyst (Tax Controller Support)

Mar 2021 - Mar 2022.

- Supported the implementation and data migration to a newly deployed tax management system, processing 500+ taxpayer records while ensuring data integrity, accuracy, and consistency.
- Performed data validation, cleansing, and user profile configuration in compliance with registry and governance standards, ensuring reliable system data for reporting and operations.
- Assisted in generating and maintaining operational reports to support tax administration, compliance tracking, and internal decision-making.
- Maintained and organized digital records, ensuring accurate data storage, retrieval, and documentation for reporting and audit purposes.
- Collaborated with cross-functional teams to support system adoption, data accuracy, and process improvements during system transition.
- Identified and resolved data discrepancies, improving data quality and reporting reliability within the tax management system.

Office Machines Nigeria Limited (OMNL)

Abuja Nigeria

Junior Business Analyst

Jan 2019 - Aug 2019.

- Supported the preparation and submission of RFP documentation, ensuring compliance, data accuracy, and version control across project teams.
- Developed and maintained system and process documentation, including user manuals and workflows, to support system usage and reporting processes.
- Participated in system testing and User Acceptance Testing (UAT), validating functionality and ensuring alignment with business and reporting requirements.
- Documented and tracked application defects, analyzing issues and collaborating with technical teams to support system improvements and data accuracy.
